## Subjects

SUBJECT DETAILS
SUBJECT TITLE, DESCRIPTOR
LEVEL 100
<p><b>DCX101- Design Context</b></p> <p>Design Context is a foundational subject that introduces students to the designed world and their place within it. Students are encouraged to explore the interconnected nature of design and its capacity to inspire change, drive progress and navigate complex challenges. Through observation, research and iterative approach students will develop a series of creative responses that demonstrate an awareness of the value of design and its ability to create meaningful interactions for people, communities and their environments.</p>
<p><b>DGDDD100- Digital Design Foundations</b></p> <p>This subject introduces a core set of industry-standard specialist design software tools. The emphasis of this subject is on building a comprehensive familiarity with these tools and features so that their application becomes second nature and can be treated as part of the overall creative tool kit. Students will work through a range of small exercises to cement their learning and to build their working knowledge by experimenting with the different tools and techniques. Students will then combine these tools and techniques to explore print and screen-based projects and in doing so, become aware of how to create flexible visual outcomes not wedded to single-use mediums</p>
<p><b>DGDVL100- Visual Language of Design</b></p> <p>In this subject, students will study the history and evolution of art and design acknowledging the major influences and commentators of the industry. The introduction of essential fundamental design principles and elements build to a comprehensive understanding, enabling students to start seeing and thinking like a designer. Students will be challenged to develop visual solutions to design problems and acquire the knowledge, skills and perspective necessary to identify and articulate techniques and concepts exhibited in design work. This is followed by an in-depth look at the design process from receiving the brief up to the client presentation and reflection on success of project.</p>
<p><b>DSO102- Design Studio 1</b></p> <p>This subject explores the relationship between materials and storytelling. It introduces students to the attributes of materiality and encourages them to re-imagine the possibilities of creating through making. Students will explore the art of paper folding, developing skills and taking creative risks. These results will be captured digitally and altered using the appropriate software. Individual tasks allow students to develop an understanding and appreciation of materials, their many varied uses, properties, and the sustainable</p>

<p>manufacturing processes related to them. Students will progress towards determining suitable materials in which to construct their final model with its form and function contextualised and supported by a documented process journal. Their final submission will be a model that reminds us that stories which fill our lives are not only spoken and written but sometimes are best told through craft.</p>
<p><b>DGDY100- Typography</b></p> <p>This subject explores the history and origins of typographic communication, from Cuneiform through to contemporary digital type. It introduces the fundamental principles and terminology relating to typography, including letterform structure, classifications of faces and styles, and typesetting. Students will work with specialist software to create and manipulate type, and will start to formulate their own set of strategies for effective use of typography as an element of graphic design.</p>
<p><b>DSO103- Design Studio 2</b></p> <p>Design Studio 2 offers an introduction to the building blocks of creating and developing brands and is designed to give students a broad understanding of the stages and methodologies adopted in the brand development process. The subject draws on the theory and practice that sits behind brand creation. It covers the broad spectrum of brand development, values, trends and branding techniques, as well as fundamentals such as brand positioning and brand architecture. The subject also explores the relationship between branding and audiences, cross-cultural influences and shifts in consumer behaviour. Students must first understand and apply the fundamentals of branding and then go on to use that knowledge as the basis for developing and progressing a brand. This theoretical and practical subject will equip students with the knowledge and insight with which to build their own branding expertise.</p>
<p><b>DGDPM100- Publishing and Media</b></p> <p>This subject develops students' understanding of typographic convention in both traditional and contemporary applications. Students will use their understanding of basic typographic formatting, page composition and layout to explore advanced typographic setting, work flow and content editing across print and digital platforms. Students will also explore the role of typographic narrative within the sequenced delivery of information across a variety of environments. They will be challenged to consider the 'voice of type' and develop a greater appreciation and understanding of how content is read and viewed in traditional and non-traditional mediums.</p>
