## 4. How to apply

Via direct application to the institution

- <https://apply.torrens.edu.au/>

## 5. Advanced standing/academic credit/recognition of prior learning (RPL)

You may be entitled to credit for prior learning, whether formal or informal. Formal learning can include previous study in higher education, vocational education, or adult and community education. Informal learning can include on the job learning or various kinds of work and life experience. Credit can reduce the amount of study needed to complete a degree.

Applicants admitted based on prior higher education study may be eligible for Advanced Standing in the form of credit and/or recognition of prior learning (RPL) under the Torrens University Australia [Credit Policy](https://www.torrens.edu.au/policies-and-forms) - (<https://www.torrens.edu.au/policies-and-forms>).

- Students with completed subjects may be eligible for specified credit and/or elective exemptions
- Students who have completed a qualification at AQF level 5 (diploma) or above may be eligible for block credit (where a block credit agreement exists)
- Students with a mix of formal study and informal and/or non-formal learning may be eligible for recognition of prior learning in addition to any credit approved.

Credit will not be applied automatically. Applicants must apply for credit and/or RPL as early as possible prior to each study period, with applications not accepted after week 2.

For further information about credit and recognition of prior learning please see <http://www.torrens.edu.au/apply-online/course-credits>

## Subjects

<b>SUBJECT DETAILS</b>
<b>SUBJECT TITLE, DESCRIPTOR</b>
<p><b>DCX101- Design Context</b></p> <p>Design Context is a foundational subject that introduces students to the designed world and their place within it. Students are encouraged to explore the interconnected nature of design and its capacity to inspire change, drive progress and navigate complex challenges. Through observation, research and iterative approach students will develop a series of creative responses that demonstrate an awareness of the value of design and its ability to create meaningful interactions for people, communities and their environments.</p>
<p><b>FA101A- Fashion Illustration</b></p> <p>Fashion Illustration introduces students to the skill of visual representation and communication through the art of drawing. It acknowledges drawing as a fundamental skill of the designer, and its importance in communicating design ideas. Students will cultivate an understanding of balance, proportion, and shape through observational drawing skills. Through visual rendering techniques of various surfaces, fabrics and structures, students gain insight into the manner in which different materials and fabrics drape, shape and change on the human body. This subject underpins the development of fundamental principles of fashion design as well as the capacity of the student to visually communicate their designs.</p>
<p><b>FA110A- Fashion Technical Drawing and CAD</b></p> <p>Fashion Technical Drawing and CAD provides a solid foundation for students to develop the hand drawing and computer drawing skills which will be used throughout their course and their career. Students establish hand-drawing skills to depict and explore technical and construction details for garments. Building upon these hand drawing skills, students are introduced to Computer Aided Design (CAD) methods and folio layouts specific for branded fashion. Students produce a series of digital folios that demonstrate their understanding of garment construction through both hand and digital drawing techniques.</p>
<p><b>DSO102- Design Studio 1</b></p> <p>This subject explores the relationship between materials and storytelling. It introduces students to the attributes of materiality and encourages them to re-imagine the possibilities of creating through making. Students will explore the art of paper folding, developing skills and taking creative risks. These results will be captured digitally and altered using the appropriate software. Individual tasks allow students to develop an understanding and appreciation of materials, their many varied uses, properties, and the sustainable manufacturing processes related to them. Students will progress towards determining suitable materials in which to construct their final model with its form and function contextualised and supported by a documented process journal. Their final submission will be a model that reminds us that stories which fill our lives are not</p>

only spoken and written but sometimes are best told through craft.
<p><b>FA111A- Fashion Studio 1: Sewing and Construction</b></p> <p>Through the exploration of a variety of cutting, sewing and finishing techniques, students are introduced to the importance of shape, form, line, and volume in garment construction. Industry terminology is defined through the execution of a variety of sewing samples and methods. Students familiarise themselves with the various components that make up a garment and the interrelationships between those components. Applying this knowledge, students execute and assemble a self-designed garment and will make decisions about the most appropriate construction techniques for that garment. Throughout their time in the sewing workroom, students will apply Work Health and Safety (WHS) practices in their workroom practice. Students participate in a Sewing Skills program – a series of additional sewing workshops that run concurrently with their formal study. These two-hour workshops provide students with an opportunity to further develop their garment construction skills.</p>
<p><b>FA112A- Fashion Studio 2: Drape and Design</b></p> <p>In Fashion Studio 2, students develop foundational design studio practice skills and knowledge. Through idea generation, fabric manipulation and draping students' progress their ideas and translate these into a commercial garment design. Students gain a deeper understanding of design elements and principles as key design concepts by conceptualising and producing 2D and 3D design outcomes. These design outcomes inform the student's final garment production in Fashion Studio 1: Sewing and Construction.</p>
<p><b>DSO103- Design Studio 2</b></p> <p>Design Studio 2 offers an introduction to the building blocks of creating and developing brands and is designed to give students a broad understanding of the stages and methodologies adopted in the brand development process. The subject draws on the theory and practice that sits behind brand creation. It covers the broad spectrum of brand development, values, trends and branding techniques, as well as fundamentals such as brand positioning and brand architecture. The subject also explores the relationship between branding and audiences, cross-cultural influences and shifts in consumer behaviour. Students must first understand and apply the fundamentals of branding and then go on to use that knowledge as the basis for developing and progressing a brand. This theoretical and practical subject will equip students with the knowledge and insight with which to build their own branding expertise.</p>
<p><b>FA106A- Fashion vs Clothing</b></p> <p>In this subject, students are introduced to various social, political and design influences that have defined historical fashion periods. Examination of several case studies of fashion occurrences will inform students of the issues, attitudes and foundations that may lead up to the formation of a fashion, the role of the designer in that process and its effect on general dress behaviour as a result. Students will analyse and apply knowledge of the history of fashion to reflect on the fashion design process and the development of their own design handwriting whilst extending technical drawing and illustration skills. Students continue to develop their technical proficiency and ability to accurately communicate their design outcomes as they are introduced to specialist software applications and techniques.</p>
