

Find your Balance

THE
PRACTICE
WELLBEING CENTRE

About us

The Practice is a student-led clinic offering quality, holistic health and wellbeing services at affordable prices.

Open to the general public, all consultations are supervised by qualified and experienced practitioners to ensure you receive the highest standard of quality and service.

Our philosophy is one of combining evidence-based health sciences with best practice established over time. We focus on preventative health to help you achieve and maintain optimal wellbeing.

@thepRACTICEwellbeing

Telehealth Consultations

The Practice Wellbeing Centre delivers secured Telehealth virtual consultations via our digital platform, allowing you to connect with our student practitioners at a time and place that suits you.

Our student practitioners provide a full health assessment, comprehensive advice, and a personalised treatment plan to assist with your well-being and lifestyle recommendations - this may also include access to practitioner-only supplements or herbal tonics.

Face and Body Treatments

Please note- these treatments are only available at set periods throughout the year, in alignment with student availability.

Please check out our FB page for regular updates on when these treatments are available.

Focusing on the health and wellbeing of the skin through results driven, therapeutic face and body rituals, these treatments are tailored specifically for the client's concerns using the most suitable products, devices and modalities. From traditional high demand beauty/spa treatments to advanced skin health protocols, our students can address a range of conditions. Specialized treatments include LED light therapy, Skin Needling, Radio Frequency, Microdermabrasion, Sonophoresis, Peels, IPL skin rejuvenation and more.

Body Composition Analysis (BIA)

Body Composition Analysis The Bioelectric Impedance Analysis (BIA) machine, is a method for estimating body composition which accurately measures body mass index, muscle mass, body fat and hydration levels. This testing is most commonly used for clients with a focus on weight loss or gain, obtaining peak physical performance, managing chronic disease risk and managing health proactively. Body Composition Analysis takes 15 minutes and is best used in conjunction with a full complementary medicine consultation where the practitioner can explain results and help you to achieve your health goals.

Please note as our clinic is in high demand a 50% late cancellation/non-attendance fee applies.

Iridology

May be used in conjunction with a naturopathic consultation to assess holistic health. If you would like a colour print or digital image of your iris then a small fee is charged for this service.

Pricing

Naturopathy, Western Herbal Medicine, Clinical Nutrition

Full fee		
First visit	90 mins	\$20
Follow-up	60 mins	\$10

Body Composition Analysis 30 mins \$10

Naturopathy

Naturopathy is a system of health care that is based on traditional philosophies and principles, and utilises a wide variety of tools and techniques to achieve health for a patient. Naturopathic practitioners blend traditional knowledge and evidence based practice to help patients achieve optimal health and wellbeing. A range of management approaches may be used including western herbal and nutritional medicine, lifestyle advice, energetic medicines including homeopathy or bush and bach flower remedies.

Clinical Nutrition

Clinical Nutrition practitioners use a range of dietary and lifestyle modifications and nutritional supplementation therapy and body composition analysis for the prevention and management of a wide range of health conditions.

Western Herbal Medicine

A contemporary Western Herbal Medicine (WHM) practitioner understands the history and philosophy of herbal practice and is trained to formulate individualised herbal prescriptions using medicinal plants from around the world. An evidence-based practice approach is taken to incorporate traditional knowledge, research and scientific evidence in prescribing decisions.

Clients may be prescribed a variety of herbal treatments including liquid extracts, teas, tablets and external preparations such as creams.
